

Association of Fishermen, Marketers and Environmentalist Farmers La Doncella (ASODONCELLA)

Mission

We are a group of fishermen, marketers, farmers and professionals who share experiences, generate knowledge and promote ideas for sustainable social, environmental and economic development in our communities to improve the quality of life. The development of fishing and aquaculture is promoted through the formulation and execution of sustainable productive projects, socio-business development, which promotes the production, consumption, processing and marketing of hydrobiological, poultry, agricultural products, among others.

Social, ecological and environmental development is also promoted in the country, contributing to sustainable development at the national and international level through the implementation of training programs on environmental, ecological issues, adaptation and mitigation to climate change, as well as the protection and conservation of aquatic biodiversity, the maintenance of ecosystem services and the generation of socioeconomic benefits, actively involving the community in these processes to solve their problems.

Vision

Be recognized at the departmental, national and international level as an organization that seeks to strengthen territorial environmental management processes in the field of conservation, development and promote the well-being of communities, in the development of strategies that contribute to the fulfillment of the objectives of sustainable development to build a better country. Be committed to the preservation of the environment and the constant development of socio-productive and agricultural activities in Colombia.

Organization objectives

- Coordinate the definition, execution and monitoring of policies, strategies and projects related to the regional regulatory framework that leads to the sustainable development of fishing and aquaculture activities.
- Promote and enhance environmental quality and social well-being for the development of fishing communities
- Promote, protect and conserve the environmental heritage of the area in order to conserve freshwater fish species.
- Strengthen territorial environmental management processes in the field of conservation, development and promotion of the well-being of communities and the development of strategies that contribute to the fulfillment of sustainable development objectives to build a better country.
- Carry out scientific research work on aquatic fauna species with the aim of achieving the conservation of these important species.
- Implement environmental education in communities in order to raise awareness in the protection and conservation of our species of fauna and flora and the environment in general.
