

ENDEMIC INDONESIA SOCIETY

**Know your Endemic
Know your Nature
Know yourself**

STATEMENT

Mega-biodiversity country, lungs of the planet. Top biodiverse country, Indonesia. It made some of us proud, even arrogant. It's not the time for us to be arrogant. Our nature does not need our pride. It is straining under our insatiable greed. We have things that many others are lacking, Endemic wildlife species. Something to protect and preserve. Not for today, but for the future generation. Not by resisting, but by educating our people about the value of our nature. We bring elegance every step of the way. Research becomes our basis, benefits for the people as a means to raise awareness, and long-term education as the backbone of our work. Conservation means much more than protecting. Conservation is giving meaning to nature and making sure it survives in our world.

Endemic
Indonesia Society

THE HISTORY

Endemic Indonesia Society (EIS) was established on 11 November 2020, starting from the same restlessness some biology graduates from education based university.

The amount of Indonesia's biodiversity does not found in other countries. The actual evidence is that Indonesia is the top country with endemic fauna and flora. The uniqueness that cannot be imitated, the vastand unique area it has, the pluralistic society, and the unspoiled corners make it so special. Unfortunately, the awareness to care for it has not been comparable to that privilege. Education is one of the main ways to change this imbalance. Combine research, nature conservation, public awareness, and education into an inseparable dish. The dish needs something flagged. Endemic is something unique. Taking it as a flagship is the trick.

That's how we strive for, and we are Endemic Indonesia Society.

MISSION

Conserving Indonesian biodiversity through research, education and community empowerment.

OBJECTIVE

- **Studying Indonesian biodiversity through endemic and threatened species as the priority**
- **Raising awareness of the importance of Indonesian biodiversity conservation through endemic and endangered species as flagship species**
- **Empowering the community to be involved and become an integral part in the conservation effort of Indonesian biodiversity**
- **Integrating environmental education in each activity**

OUR MEMBERS

Director

Zulqarnain Assiddiqi, S.Pd.

Secretary

Rahmadiyono Widodo, S.Pd.

Finance Manager

Prajawan Kusuma Wardhana, S.Pd.

Programme Manager

Ahmad Zulfikar Abdullah, S.Si.

Expertise Staff

Hening Triandika Rachman, S.Pd.

R. Arif Alfauzi, S.Si.

Andi Joko Purnomo, S.Pd.

Afrizal Haris, S.Si.

Nurrohman Eko Purnomo, S.Si.

Shaim Basyari, S.Pd.

Scientific Board

Dr. Agung Wijaya Subiantoro, M.Pd.

(Biology Lecturer of Yogyakarta State University)

Rio Christy Handziko, S.Pd.Si., M.Pd.

(Biology Lecturer of Yogyakarta State University)

OUR ACTIVITIES

IN SEARCH OF RUCKII

In search of the critically endangered and endemic bird, *Cyornis ruckii*, during August 2022 in the province of Jambi, Sumatra. This search was funded by Mohammad bin Zayed Species Conservation Fund and Oriental Bird Club.

SEMINAR AND TRAINING ON SHOREBIRD BANDING FOR BIRD CONSERVATIONISTS

In collaboration with Paguyuban Pengamat Burung Jogja/PPBJ (local birdwatcher society), at the end of 2022 we organised the training which took place at Trisik Beach, Yogyakarta. This event was supported by East Asian-Australasian Flyway (EAAFP).

WORLD MIGRATORY BIRD DAY

In the celebration of World Migratory Bird Day 2023, with supported by EAAFP, we conducted several activities such as birdwatching, school visit, competition, and webinar. Participants came from different backgrounds like students, teachers, policy makers, mass media, and researchers.

OUR ACTIVITIES

- Guest Lecturer in Yogyakarta State University with the topic of "Dragonfly of Indonesia"
- In collaboration with PPBJ as host of regular birbanding training in Yogyakarta
- Guest Lecturer in Ahmad Dahlan University with the topic of "Bird Diversity, Identification Technic and Potential Research"
- In collaboration with Yogyakarta State University as host of Seagrass Ecosystem Talkshow
- Speaker at the National Seminar on Environment Conservation in Ahmad Dahlan University
- And many more...

THANK YOU
