

Ethnobiological Society of Indonesia (PMEI)

A recent annual report and strategic Plan:

In the past three years, PMEI has conducted many conservation projects for Indonesian endemic plants, such as *Castanopsis argentea* and *Castanopsis tungurrut* in West Java, *Magnolia sulawesiana* in Central Sulawesi, and now following for *Mangifera casturi* in South Kalimantan, and *Nepenthes rigidifolia* in North Sumatra.
