

**Diego A. Gómez Hoyos** is biologist and MSc in wildlife management. Diego has worked for the Colombia program of Wildlife Conservation Society and he is currently the coordinator for Costa Rica of the organization ProCAT International. Also, he is member and founder of the Colombian Zoology Association, member and founder of the Atelopus Survival Initiative, member of the IUCN Amphibian Specialist Group, member of NING Conservation Leadership Programme, and advisor of the Conservation Needs Assessment of the IUCN/ Amphibian Ark. His conservation work about threatened species is comprehensive, based on scientific evidence and with community-based strategies that involves citizen science and conservation education. His work is supported by 35 peer-reviewed publications from which stand out:

Thornton, D.,...(+ 27 authors)..**D. A. Gómez-Hoyos**...(+ 27 authors). 2020. Precipitous decline of white-lipped peccary populations in Mesoamerica. **Biological Conservation** 242: 108410. Doi: <https://doi.org/10.1016/j.biocon.2020.108410>
