PERSONAL STATEMENT

An innovative and dynamic individual with a proven track record of conceiving, commissioning, developing and directing environmental projects in Sumatra and community development projects both nationally and internationally. I have held positions including Executive Director, President, Project Director, Founding Director as well as translator, budget planning specialist, administrator, interpreter, trainer, and education provider. I gained extensive experience of all phases of community development projects during my participation in the Canada World Youth Exchange Program where I developed project management skills. In addition during my appointment at the Leuser Development Program, I was responsible for the management of the environmental project budgets in accordance with the European Commission guidelines, and preparing project reports. In 2002 I recognized the need for more information and awareness of the plight of the Sumatran Orangutan and with support from the Sumatran Orangutan Society, formed the OIC, now a fully operational conservation program.
