

The entire team was trained for data collection, to use the Avenza App and to employ the playback method. In June, we began collecting data to estimate occupancy of BFLT groups. The goal is to walk at least 50 quadrants. Until the month of november it was possible to walk 35 quadrants.

Used the Avenza App and to employ the playback method.

Table 1. Number of BFLT group sightings recorded occasionally during occupancy estimation monitoring in Ariri - Cananéia (SP) in 2019.

Date	Number of individuals	Observer	Region
May	6 (4 adults and 2 juveniles)	SPVS team	grid 2
June	4 adults	SPVS team	Beggining of Araçauaba trail – grid 7
July	7 individuals	SPVS team	Next road – grid 7
July	6 adulst	SPVS team	Grid 3
September	5 (4 adults and 1 juveniles)	Lagamar-Cananéia State Park team	Beggining of Araçauaba trail – grid 7
