

Guardians of the Water: Educational program on endangered fauna and flora of the Coton River

Training for local environmental promoters (instructors)

With the help of local researchers, we trained three environmental promoters who were in charge of executing the educational program.

Design and execution of the toolbox "Caja Cotona"

The cotona box ("Caja Cotona") was a tool used by the environmental promoters to guide the teaching process with the children. The cotona box ("Caja Cotona") was a tool used by the environmental promoters to guide the teaching process with the children. The box contained a local encyclopedia on threatened species, field book, stickers, didactic cartography, drawing material, etc.

Educational program scope

The educational program reached 21 local schools and 320 children. The graduation event was held in December 2021.
